

IGIRANEZA IRENE

INFORMATION MANAGEMENT / IT PROFESSIONAL

Kigali, Rwanda | 0789640856 | igiranezaa85@gmail.com
[linkedin.com/in/irene-igiraneza-b493b3368](https://www.linkedin.com/in/irene-igiraneza-b493b3368)

PROFESSIONAL PROFILE

Motivated Information Management and IT professional with practical experience in computer maintenance, backend development, databases, APIs, and information systems. Experienced with Java, Spring Boot, REST APIs, PostgreSQL, Oracle/PL/SQL, Git/GitHub and Microsoft Office. Strong analytical, numerical and problem-solving abilities, with attention to detail, teamwork, adaptability and a strong interest in banking, digital financial services and technology-driven customer solutions.

EDUCATION

Adventist University of Central Africa (AUCA) — Bachelor's studies in Information Management / IT

PROFESSIONAL EXPERIENCE

Advanced Backend Development Intern — SheCanCODE / Igire Rwanda Organization (IRO) | 16-week program

- Developed backend applications using Java and Spring Boot, including RESTful API development.
- Worked with PostgreSQL and database-driven applications, applying SQL and database management concepts.
- Used Git and GitHub for source-code management, branching, commits and collaborative development workflows.
- Applied object-oriented programming, exception handling, CRUD operations, DTOs and API design in practical projects.
- Built and worked on information-system projects requiring analytical thinking, troubleshooting and attention to detail.

Computer Maintenance Technician — Mini Papeterie and Cyber | 2022–2023

- Provided computer maintenance and technical support in a cyber and stationery business environment.
- Diagnosed and resolved common computer and software-related issues.
- Supported users with day-to-day technology needs and maintained reliable computer operations.

SELECTED PROJECTS

Emergency Response and Bed Availability Tracker — Oracle/PL/SQL information system using procedures, functions, triggers and packages to manage emergency response and hospital bed availability.

Patient Management System — Java-based system implementing patient-related CRUD operations, exception handling and structured application logic.

Social Media Platform API — Spring Boot API project involving DTOs, Lombok, CRUD operations and backend service development.

Maintenance Request System — Information-system project focused on recording, managing and tracking maintenance requests.

TECHNICAL SKILLS

- **Programming & Backend:** Java, Spring Boot, REST APIs, Object-Oriented Programming
- **Databases:** PostgreSQL, Oracle Database, PL/SQL, SQL, database management
- **Development Tools:** Git, GitHub, IntelliJ IDEA, VS Code, SQL Developer, pgAdmin
- **Microsoft Office:** Microsoft Excel, Word, PowerPoint, Access
- **Other:** Data analysis, information systems, troubleshooting, technical support

CORE COMPETENCIES

- Analytical & numerical reasoning
- Problem solving
- Attention to detail
- Customer service
- Communication
- Teamwork
- Adaptability
- Organization
- Integrity & professionalism
- Confidentiality & information security awareness

LANGUAGES

- Kinyarwanda — Excellent speaking, writing and listening
- English — Good speaking and listening; very good writing

CERTIFICATIONS & TRAINING

- Advanced Backend Development Program — SheCanCODE / Igire Rwanda Organization (IRO)
- Relevant academic and practical training in Java, Spring Boot, APIs, databases, PL/SQL and information systems
